CONNECTING TO EDUROAM WI-FI

Guide for CZU students and staff · setup using geteduroam

EN LANGUAGE

First step: switch UIS to English

Click the British flag in the top right corner of UIS. Menu items in this guide match the English version of UIS.

! IMPORTANT

Eduroam uses its own Wi-Fi password

You set the eduroam password separately and it is **not the same** as your regular password for UIS and other university systems.

BEFORE YOU START

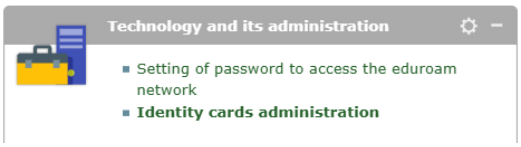

UIS

University Information System (UIS)

The main CZU study system at uis.czu.cz. After signing in, you enter **Personal administration**, where you can e.g. set your eduroam password.

WHERE TO SET YOUR EDUROAM PASSWORD

- **Students:** at uis.czu.cz, in Personal administration open **Technology and its administration › Setting of password to access the eduroam network** or use the MyČZU app.

The correct item in UIS

Click "Setting of password to access the eduroam network" in the **Technology and its administration** tile.

- **Staff and doctoral students:** on the intranet go to **Applications › Personal › My profile** and select **Wi-Fi** in the top right corner.

STEP BY STEP

1 **Set your eduroam password**
In UIS or in your intranet profile, create a separate Wi-Fi password. **The password becomes active within 15 minutes.**

2 **Connect directly or install geteduroam**
On Apple, Samsung and Windows 11 devices, it is usually enough to select the eduroam network and enter your username and password. On other devices, install the **geteduroam** app. **If an Apple or Samsung device cannot connect, use geteduroam as well.**

3 **Select your institution**
In the geteduroam app, search for **Česká zemědělská univerzita v Praze / ČZU** (Czech University of Life Sciences Prague).

4 **Enter your username**
Your university login in the form **login@czu.cz**, e.g. xname000@czu.cz.

5 **Enter your Wi-Fi password**
Use your separate eduroam password – **not your UIS password.**

6 **Finish connecting**
Complete the configuration and connect to the eduroam network.

LOGIN DETAILS AT A GLANCE

Wi-Fi network	**eduroam**
Username	**login@czu.cz** (e.g. xname000@czu.cz)
Password	your separate eduroam Wi-Fi password

Note: login@czu.cz is your eduroam login identity, not an e-mail address.

WHY IT WORKS THIS WAY

Recommendation	Reason
A separate eduroam password	The Wi-Fi password is stored on your devices (phone, laptop). If it ever got into the wrong hands from one of them, it would not give access to UIS, e-mail or other university systems.
Username in the form login@czu.cz	The part after the @ identifies your home institution. Thanks to it, you can connect to eduroam with the same account at other universities in the Czech Republic and abroad.
The geteduroam app	It automatically installs and configures the profile for connecting to the eduroam network.
Wait up to 15 minutes after setting the password	The new password is not transferred to the eduroam system immediately. If you connect sooner, the password may not work yet.

NEED HELP?

Guides for individual devices and configuration tools are available on the CZU eduroam page. If you cannot connect, submit a request to the Helpdesk.
