Linux – Fedora 29

Before any configuration you have to setup secure password for connection (same as for wifi eduroam):

- a. <u>https://is.czu.cz</u>
- b. Application Moje ČZU for Android and iOS.

Manual configuration

From Download section download "certificate for authentication" and save it.

Certificate

On the Network Manager applet under wired Connected select Wired Settings

Choose plus symbol under wired Connection and another window shows up.

٩	Settings	Network	×
*	Bluetooth	Wind	
	Background		
	Notifications	Connected - 1000 Mb/s	
Q	Search	VPN +	
P	Region & Language	Not set up	
0	Universal Access		
	Online Accounts	Network Proxy Off	
Ш	Privacy		
<	Sharing		
40	Sound		
Ge	Power		
ā,	Network		
÷	Devices >		
R -	-Nataile		

Fill all required information and continue to the **Security** tab.

Cancel	New Profile	Add			
Identity IPv4	IPv6 Security				
Nar	me Dormitory CZU				
MAC Addre	00:0C:29:B8:B0:14 (ens33)				
Cloned Addre	255				
M	TU automatic	- +			

Fill all required information as it is on the next picture. In the CA certificate field choose certificate you downloaded in the previous section. Finish it with *Add*

Cancel				New Profile	Add	
Identity	IPv4	IPv6	Securi	ty		
		802.1x	Security	ON		
	Authentication Anonymous identity			Protected EAP (PEAP)	•	
		CA ce	rtificate	adius1.czu.cz.cer	<u>e</u>	
				No CA certificate is required		
		PEAP	version	Automatic	-	
	Inner authentication			MSCHAPv2	•	
		Us	ername	xname000@czu.cz		
		Pa	assword	•••••	<u>44</u>	
				Show password		

Now choose the connection name and you should be connected.
